

PERENNIAL

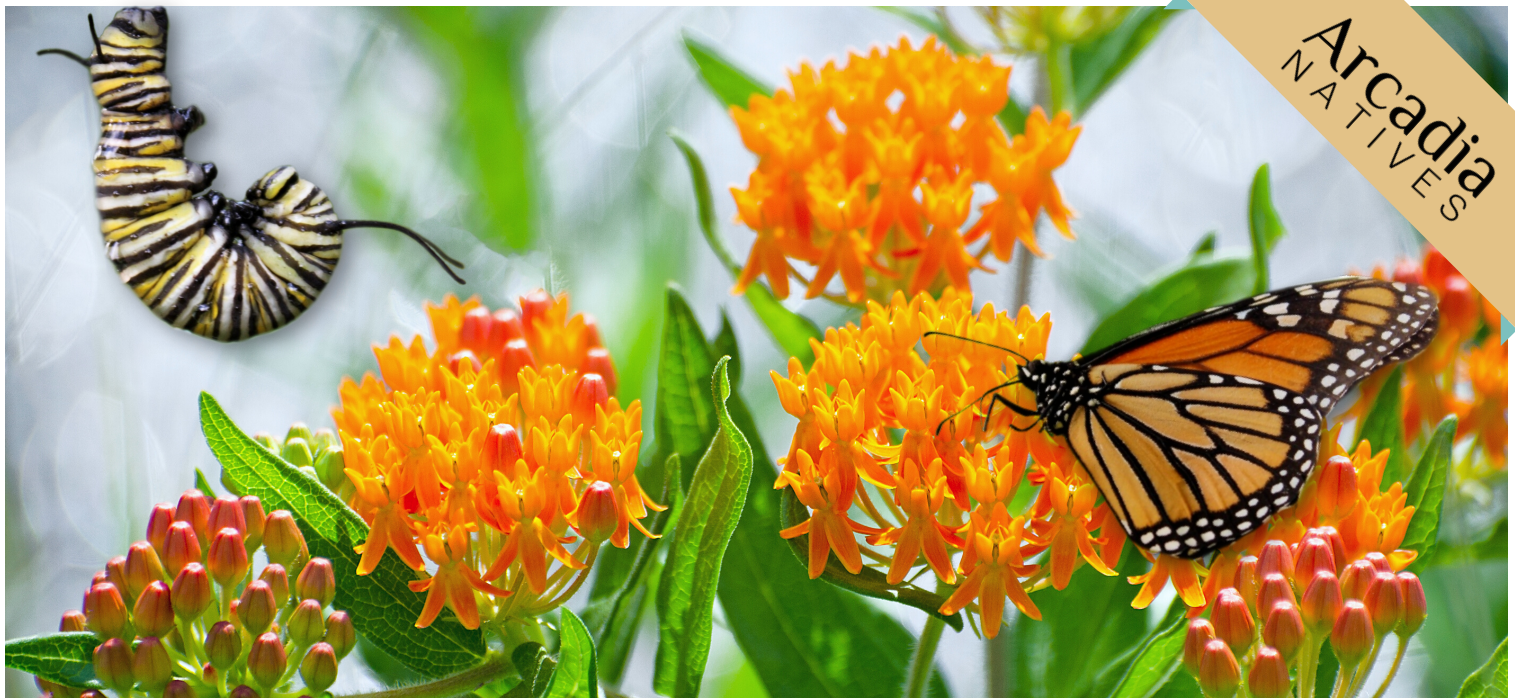

Butterfly Milkweed

Asclepias tuberosa

MILKWEED INSECTS

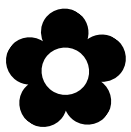

- Grows well in poor, dry soil
- Blooms orange, June-Aug
- Use in borders & on slopes
- Important host plant
- Slow to emerge in spring

HELPFUL TIPS:

Must have well-draining soil. Once established, does not transplant well. Flowers in 2-3 years when grown from seed.

COMPANIONS: Pussytoes, Rudbeckia, Blazing Star, Wrinkle Leaf Goldenrod, Early Sunflower, Beardtongue, Purple Lovegrass, Mountain Mint, Little Bluestem
