

PERENNIAL

# Spotted St. John's Wort

## *Hypericum punctatum*

ID INVASIVE  
ST JOHNS WORT

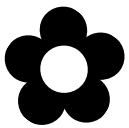

Arcadia  
NATIVES

- Used in herbal remedies
- Blooms yellow, July-Sept
- Flowers & leaves have conspicuous black dots
- Primarily bee pollinated

### FUN FACTS:

AKA Dotted St. John's Wort.  
The plants "spots" are actually glands that contain oils. Leaves take on a red hue with age.
