

PERENNIAL

Jacob's Ladder

Polemonium reptans

ANDRENA POLEMONII
SPECIALIST BEE

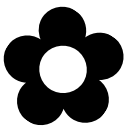

- Native to woodland edges
- Blooms blue, April-June
- Early food for pollinators
- Attractive foliage
- AKA Greek Valerian

HELPFUL TIPS:

Tolerates full sun only with adequate soil moisture. Prefers some shade. Freely self-seeds. Goes dormant in drought. Useful slope erosion control.

COMPANIONS: Woodland Phlox, Columbine, Seersucker Sedge, Ferns, Bishop's Cap, Virginia Bluebells, Foamflower, Large-Leaved Aster, Meehan's Mint, Golden Alexanders
