

PERENNIAL HERB

Slender Mountain Mint

Pycnanthemum tenuifolium

A CLOSER LOOK:
SLENDER MT. MINT

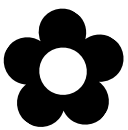

- Native to upland prairies/dry woods
- Blooms white/lavender, June-Sept
- Narrow, needle-like leaves
- Forms small colonies over time
- Loved by butterflies & bees

FUN FACTS:

Less prone to foliar disease than other mints. Leaves may turn yellow in extreme drought. Tallest in rich soil.
