

PERENNIAL

New England Aster

Symphyotrichum novae-angliae

GROWING
GUIDE

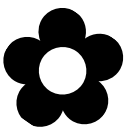

- Enjoys full sun; adaptable
- Blooms pink/purple, late summer
- Flower color can vary greatly
- Spreads prolifically by seed
- Loses lower leaves in drought

HELPFUL TIPS:

Cut back by 1/2 in July for a more compact plant. Benefits from competition of nearby plants to help minimize flopping.

COMPANIONS: *Giant Sunflower, Showy Goldenrod, Wingstem, Giant Ironweed, Boneset, American Germander, Wild Senna, Fringed Loosestrife, Queen of the Prairie, Dogbane*
